I also have everything from the 3.5.5 bundle. I have the scanned/edited manual (that has the typo and colour error) and they have the full manual with the correct wording. A man has been arrested in relation to the Westminster attack after a DNA sample was found in a home linked to him. The 41-year-old was detained in connection with the Tuesday evening incident in which three men driving a car mounted a pavement and attacked a group of pedestrians. Police officers moved to a house in Kensington and a 53-year-old man was arrested on suspicion of conspiracy to murder. A second man, 45, was arrested in Hove, East Sussex, on suspicion of the same offence, and a third, 31, was detained in Milton Keynes. The arrests come as the Metropolitan Police confirmed today that two more men in their 20s have been held on suspicion of the same offences.
